

SHELLI BOGGS

Shelli Boggs was born and raised in the Great state of Arizona! She has 3 kids and 7 grandkids. Shelli worked in education for 13 years and has seen first hand the corruption that surrounds that broken system. After working as an educator for 11 years she stepped away after the retaliation against her by administration became too much. Shelli accepted a position as The Director Of Programs for The Mesa Chamber of Commerce. After taking a 2 year break from education she decided to try again in a new district. That year the Red for Ed teacher walk out occurred. She did not participate in that and the retaliation began again.

After the teacher walk out, Shelli decided to run for school board in 2018. She was successful in the race and was able to expose the corruption in the school district she left years before. The board voted unanimously to terminate the superintendent after a formal investigation showed misuse of Arizona tax dollars amongst many other unethical practices. Shelli is currently The President of that school board and is serving her 2nd 4 year term.

Through her leadership, the school district's culture has made a 100% turn around. Students are empowered through actual education in the district where she serves. The district is in the process of starting the very first of its kind program for students aging out of the foster system. Board President Boggs hopes that this program will spread throughout the country to help educate and empower the most vulnerable kids.

Shelli made the decision to leave teaching due to the extreme rise in far left politics taking over the school districts after COVID shut down the country. She taught her final English class in May of 2020 and currently works at the Arizona State Capitol.

For the last 10 years Boggs has dedicated her extra time and energy into fixing Arizona schools. Shelli has been active in helping moms and dads get elected in school districts all over the state. Shelli Boggs feels that if we fix our schools, we save our country. She invites parents to get off the bench and join her and others on this battlefield. Saving kids minds and hearts is her mission. Loving our country is her passion. ■
